

**Boil Water Rescind Notice
For:**

**West of 6040 FM 1651, West FM 3227
VZCR 2502, VZCR 2503, VZCR 2504, VZCR 2505, VZCR 2409
VZCR 2410, VZCR 2411, VZCR 2412, VZCR 2413, VZCR 2414
VZCR 2423, VZCR 2424**

Any customer in the area above who experiences low to no pressure during the emergency line repair on VZCR 2414

On **December 9, 2025**, the Texas Commission on Environmental Quality (TCEQ) required our public water system MacBee Special Utility District, PWS ID #23400045, to issue a Boil Water Notice (BWN) for the above area and to inform our customers that due to the distribution pressure dropping below 20 PSI, or an interruption in service, water from our system must be boiled before consumption.

Our system has taken the necessary corrective actions to restore adequate pressure, disinfectant levels, and/or bacteriological quality. It has provided TCEQ with testing results indicating that the water no longer requires boiling as of **December 11, 2025**.

If you have questions, contact the Office at 903-873-2109 or 430-307-5544. If a customer wishes to reach TCEQ, they may call 512-239-4691.
