

To our valued MacBee SUD customers

The district strives to meet the growing demand of our customers in conjunction with maintaining and improving the existing investment in the water system infrastructure. At a posted, regular Board of Directors meeting that was held on Monday, October 11, 2021, the Board of Directors adopted new water rates. The new water rates will become effective on January 1, 2022 and are attributable to new water system improvement projects, increasing costs for gas, chemicals, utilities, etc.

The water system improvement projects include construction of new water distribution lines and renovations of the district's water treatment plant and booster stations.

*A summary of the rate changes approved by the Board of Directors is set forth below:*

Service Availability Charge for water:

Standard 5/8" x 3/4" meter      \$35.00

1" meter      \$87.50

Base Rate is based on flow demand on any larger sized meters. Requests for larger than 1" sized meters will require an engineer study.

**Gallons:**

**Rates effective January 1, 2022:**

100 to 4,000	\$5.50 per thousand gallons
4,100 to 8,000	\$6.50 per thousand gallons
8,100 to 20,000	\$7.50 per thousand gallons
20,100 and over	\$8.50 per thousand gallons

The rates will be effective for customer usage when meters are read in January and be reflected on the January 2022 billing statements.

MacBee SUD is committed to providing the highest standard quality water and service for our customers at the lowest cost possible.

Sincerely,

MacBee SUD Board of Directors
